## Emergency plan phases

### **Heigoa falu a tau Lekua Tupu Fakaofu neke lauia ai a Niue**

Ko e Ofisa Tau Lekua Tupu Fakaofu ha Niue mo e tau hoa mahuiga, pihia foki mo e falu a Faahi Gahua foki kua lago ki ai kua kitekite mo e mailoga ke he tau lekua fakaofu ne maeke ke lauia ai a Niue. Kua ha ha I ai e tau lekua lalahi tuga kua tohia ai I lalo. Ko e tau lekua kehekehe mo e tau mena kua lata ke taute e koe ke tau magaaho ka tupu ai , to fakakite ai ke he tau lanu mo e to fakailoa atu ai fakamafiti kia mutolu.

### **Gagao Manu/Tau Lakau**

Kua haha i ai loga e tau gagao kua maeke ke fakalekua e tau akau aoga ha Niue (tuga e :talo), tau manu aoga (tuga e: tau pi) ti maeke ke tupu mai ai e hogeia he tau mena kai , mo e mole noa e tau hala moua tupe.

### **Civil Unrest/Lutu e Tau Tagata**

Ko e ha toloaga aulua po ke ha fakailoaga lutu kua fakalagalaga e moui mafola he tau tagata, pihia mo e motu.

### **Tau Vai kona kua Maligi**

Ko e ha vai kona kua maligi ke he moana po ke fuga kekeleke ne kua eke mo taha lekua ke he tau tagata mo e takatakaimotu.

### **Lekua lahi ke he tau koloa motu**

Ko e ha lekua lahi po kua loa ke he vai, tau puhala tu, po ke tau penesini. Kua tupu mai he taha lekua(tuga e: afa) po ke ha mena kua tupu (tuga: lekua e vai lahi I lalo fonua, mate e matapatu enesini he fale hila).

### **Pakia mai he tau PeleoAfi**

Ha lekua ke he pasi, vakalele ha vakatoga, po ke ha pakia ke he loga e peleo afi, ti tupu mai e loga e tau tagata pakia, po kua mamate.

### **Afa**

Ko e tau afa kua to he tau tau oti, mo e tau matagi lalahi, tau afa, tau kuolo, mo e uha lolo. Koe taha afa lahi ko Heta, ne to ai he (2004) ne malona lahi ai e tau koloa motu mo e tau kaina tagata, mua atu ke he faahi lalo he motu, mo e mamate ai e 2 e tagata.

### **Vaha To e Laa**

Mago e fonua ka nakai fai uha, ti mago e fonua mo e mamate e tau fua kua to, ti tupu mai e hogeia e tau mena kai mo e nakai fai tupe. Magomago e fonua ka maha e tau vai I lalofonua ti ku lahi e vai ne maeke ke utu mo e utafano he motu.

### **Mafuike**

Maeke e mafuike ke to mai ke he kaava ha Tonga mo Kemateki. Nakai to tumau e mafuike ki Niue kae maeke ke moumou e tau puhala tu, tau fale, mo e maeke ke fakalekua, fakapakia mo e mamate ai e tau momoui tagata.

### **Afi–Vela e Vao po ke Fale**

Maeke ke malona lahi ai e tau fale, mo e utakehe e tau momoui tagata. Ko e matakavi ne fa vela tumau ko Vaiea, he matagi havili agamau e magamotu mo e tau vao he maaga ia ke he loga e tau tau.

### **Tau Tagata Galo**

Kua lata ke o mo e kumi aulua kaeke ke hoko ha lekua pihia.

### **Gagao Tupu (Totolo mo e pikitia)**

Kaeke ka tupu ha gagao kua mafiti ke pikitia (tuga e tau namu – Fiva Tigiki) po ke ha gagao mafiti ke pikitia mo e gahua lahi ki ai e Faahi Malolo Tino(tuga e Fuluu).

### **Tiotio**

Taha matagi lahi tupu mai kaeke ke vela lahi e moana ti uka lahi ke fuafua tuai. Maeke ke malona lahi e tau puhala tu, tau fale mo e tau moui tagata.

# Niue Disaster Risk Reduction Booklet

# Disaster information

## What you need to know?

ALERT COLORS	GENERAL MESSAGING	WHAT YOU SHOULD DO?
BLUE ALERT (Phase 1 - Potential Threat)	Issue Advice. Ensure general preparations	<ul style="list-style-type: none"> <li>• Be alert</li> <li>• Check in with radio and other media on status of potential threat</li> <li>• Charge electronic equipment</li> <li>• Begin preparing emergency kit for family</li> </ul>
YELLOW ALERT (Phase 2 – Imminent Threat)	Prepare to Keep Safe	<ul style="list-style-type: none"> <li>• Prepare your home and/or business</li> <li>• Ensure your family and close ones are safe</li> <li>• Clean up outside if necessary</li> <li>• Prepare your home if possible</li> <li>• Prepare your emergency kit</li> <li>• Ensure you have a radio with batteries for information</li> </ul>
RED ALERT (Phase 3 – Immediate Threat)	Remain indoors	<ul style="list-style-type: none"> <li>• Remain indoors in the strongest part of the house</li> </ul>
ORANGE ALERT (Reduced Threat)	Immediate Threat has passed	<ul style="list-style-type: none"> <li>• Await official advice</li> <li>• Tune into your radio if possible</li> <li>• Be careful during the clean up and take government advice during this process</li> </ul>
GREEN ALERT (No Threat)		Return to Normal

## Emergency plan phases

# What disasters may affect Niue?

The National Disaster Management Office of Niue along with our key partners and stakeholders have assessed the potential threats that posed to Niue. This includes both natural disasters along with other significant hazards as listed below. Each hazard and the actions required by you in times of disaster will be colour coded and communicated as early as possible.

## **Animal/Plant Disease**

A wide range of potential diseases that threaten Niue's major crops (eg: taro), productive animals (eg: bees) and could result in food scarcity and economic losses.

## **Civil Unrest**

Major public demonstrations or uprising that threatens safety, people, and/or property.

## **Hazardous Spill**

Potentially marine or on land causing threat to public safety and the environment.

## **Major Infrastructure Failure**

A widespread and/or long-term disruption to water, roads or fuel. May be a result of another hazard (eg: cyclone) or an isolated event (eg: contamination of the main water source, failure of the main electricity generator).

## **Motor Vehicle Accident**

Bus, plane, ship or multiple car accident resulting in multiple casualties or deaths.

## **Cyclone**

Tropical cyclones occur most years with high winds, storm surges and rain. The most significant cyclone in recent years was Cyclone Heta (2004) which caused widespread destruction of infrastructure and property (particularly along the western coast) and the loss of two lives.

## **Drought**

Agricultural droughts arise from low levels of rainfall and low soil moisture content and cause failure of agricultural production resulting in food scarcity and economic losses. Hydrological droughts are when water lens levels fall threatening Niue's water supply with potential for potable water shortages.

## **Earthquake**

Main earthquake risk arises from the Tonga-Kermadec Trench. Earthquake risk in Niue is generally considered low, but could cause damage to infrastructure, buildings, and result in displaced, injured, or deceased persons.

## **Fire – Bush or House**

Potential for major loss of property and threat to life. The highest risk area is in Vaiea due to the prevailing winds and prone vegetation, where a bush fire occurs most years.

## **Missing people**

Requiring major search and rescue exercise

## **Pandemic/major outbreak (health threat)**

An outbreak of disease that may be vector-borne (eg: mosquitos-Dengue Fever) or highly contagious diseases with high public health support requirements (eg: influenza)

## **Tornado**

Weather event, typically in higher ocean temperatures, otherwise difficult to predict. Could result in damage to damage to infrastructure, buildings, and threaten life safety

# How we rate emergencies?

MINOR EMERGENCY	MAJOR EMERGENCY
Animal/Plant Disease	Cyclone
Civil unrest	Drought
Hazardous spill	Earthquake
Major Infrastructure failure	Fire – Bush or House
Motor Vehicle Accident	Missing People (Land & Sea)
	Pandemic (major disease outbreak)
	Tornado

# Cyclone

ALERT WARNING	EXPECTATIONS	ACTION
Blue Alert	Cyclone in the area may impact within 24-48 hours. Heavy rain may occur prior to cyclone arriving. Prepare battening gear, emergency kits, etc.	<ul style="list-style-type: none"> <li>• Ensure that all flying objects around the home are stored away safely</li> <li>• Cut down trees that are close to your house</li> <li>• Start to gather material that will be needed in case you have to batten down your house</li> <li>• Check that you have everything that are supposed to have like batteries for your radio and torches</li> <li>• Check your disaster plans and family emergency kit and follow instructions from the National Disaster Management Team</li> </ul>
Yellow Alert	Cyclone threat increased Strong winds very likely to arrive within 12 hours Preparations – batten down, prepare to evacuate, etc.	<ul style="list-style-type: none"> <li>• Collect children from school, or if before school hours, keep them at home</li> <li>• Collect water. Remember electricity may be turned off and pumps will not operate</li> <li>• Batten down houses and place shutters (and tape) on windows</li> <li>• If you have important papers or valuable items, put them in a plastic bag or water proof box</li> <li>• If you are moving to a safe shelter, prepare your family emergency survival kit and food and start moving</li> <li>• Listen closely to the radio</li> </ul>
Red Alert	Cyclone impact or imminent impact Remain indoors Monitor radio and take action as instructed.	<ul style="list-style-type: none"> <li>• Unplug all electrical appliances from the walls</li> <li>• Simply turning the power off is not sufficient action to guard against lightning strikes and power surges</li> <li>• Remain indoors</li> <li>• Continue to listen to your radio</li> </ul>
Orange Alert	Strong winds, possible rain but safe to go outside Cyclone moving away from Niue Assess impacts, check neighbours, seek assistance	<ul style="list-style-type: none"> <li>• Follow instructions from the authorities</li> <li>• Avoid moving or driving around</li> <li>• Assess all damaged infrastructures</li> <li>• Report and seek assistance where necessary</li> </ul>
Green	Return to Normal – impact of event have been largely mitigated to resume normal community and business functions. Recovery phase may continue following a major event	

# DROUGHT

ALERT WARNING	EXPECTATIONS
Blue Alert	Abnormally low rainfall > 1 month – may be accompanied by higher temperatures Messaging around careful water use, fire threat
Yellow Alert	Prolonged low rainfall, dry topsoil and/or water lens level dropping Messaging around conserve water and consider adaptive agricultural measures
Red Alert	Extremely dry soil conditions, agriculture severely impacted and/or water lens level impacting public water supplies
Orange Alert	Rainfall starting to restore soil moisture and/or water lens but not back to normal levels
Green	Return to Normal – impact of event have been largely mitigated to resume normal community and business functions. Recovery phase may continue following a major event

# MAJOR FIRE

ALERT WARNING	EXPECTATIONS
Blue Alert	Extremely dry conditions, high fire threat Ban on major fires/burn-offs
Yellow Alert	Fire occurs, not immediately contained Infrastructure or property at risk Evacuate potential risk areas Construct fire breaks
Red Alert	Fire impacting people or property, uncontained Airplane crash fire Continue containment measures, stay away from area
Orange Alert	Fire contained, potential flare ups People can return to properties deemed safe
Green	Return to Normal – impact of event have been largely mitigated to resume normal community and business functions. Recovery phase may continue following a major event

# INFLUENZA PANDEMIC

ALERT WARNING	EXPECTATIONS
Blue Alert	Human to human influenza clusters are occurring overseas, beyond South Pacific Review preparations
Yellow Alert	Clusters occurring in South Pacific Increased attention to border health monitoring
Red Alert	Cases occurring in Niue Ban public meetings and implement work from home measures Provide vaccines if available
Orange Alert	Reduced cases occurring Social distancing still required
Green	Return to Normal – impact of event have been largely mitigated to resume normal community and business functions. Recovery phase may continue following a major event

# INFECTIOUS AND VECTOR BORNE DISEASE

ALERT WARNING	EXPECTATIONS
Blue Alert	Isolated instances of contagious or vector borne diseases Review preparations such as insect repellent, clean-up, hand washing
Yellow Alert	Increased attention to border health monitoring Messaging over public health measures (hand washing, repellent, avoid large social events)
Red Alert	Multiple occurrences, evidence of local spread Ban on public meetings, implement work from home measures Continued public health messaging
Orange Alert	Reduced cases occurring Social distancing still required
Green	Return to Normal – impact of event have been largely mitigated to resume normal community and business functions. Recovery phase may continue following a major event

# TSUNAMI

ALERT WARNING	EXPECTATIONS
Blue Alert	PTWC advises potential tsunami threat from distal earthquake
Yellow Alert	Tsunami threat confirmed less than 4 hours away Key messaging: Stay away from coast, move inland
Red Alert	Tsunami expected within 1 hours and impacting Stay away from sea and coast For large tsunami, move inland immediately
Orange Alert	PTWC advise tsunami threat receding Return to areas not impacted Follow advise on local sea currents
Green	Return to Normal – impact of event have been largely mitigated to resume normal community and business functions. Recovery phase may continue following a major event
